

The evolution of contextual targeting: using brain data to get ad placement right

The need for smart contextual targeting

Increased expectations of
transparency in digital

Reach \neq Attention

**The new media
equation:**

Reach + Relevance

**Thinking critically
about context is
crucial**

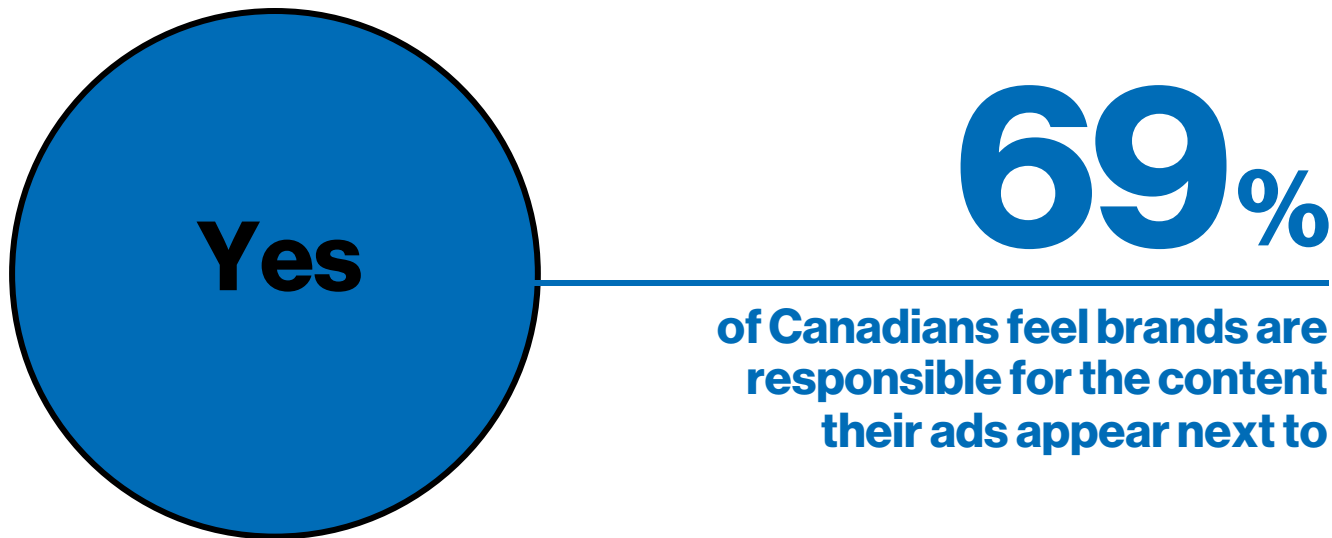

Are **brands accountable** for the content their ads are adjacent to?

Are **brands accountable** for the content their ads are adjacent to?

Are **brands accountable** for the content their ads are adjacent to?

● Source: Value of Content Environment Study, YouGov, March 30-April 7, 2018

● Do you believe that brands and companies have a responsibility to always know where their advertising is being placed online (i.e., on the sites that their ads appear or content their ads appear next to)?

After seeing ads next to offensive content

69%

say they feel much
less favourable towards
those brands

25%

More boycotting of brands /
products because of sites or
content its advertised on

Source: Value of Content Environment Study, YouGov, March 30-April 7, 2018
If you came across the following types of content on a website, how much more or
less favourable would you feel towards the brands that advertise on that site?
How much more or less would you say you do each of the following online activities
now versus 6 months ago (i.e., since early October 2017)?

**What is high
quality content?**

What makes content “high quality?”

Trustworthy

Uncluttered

Current

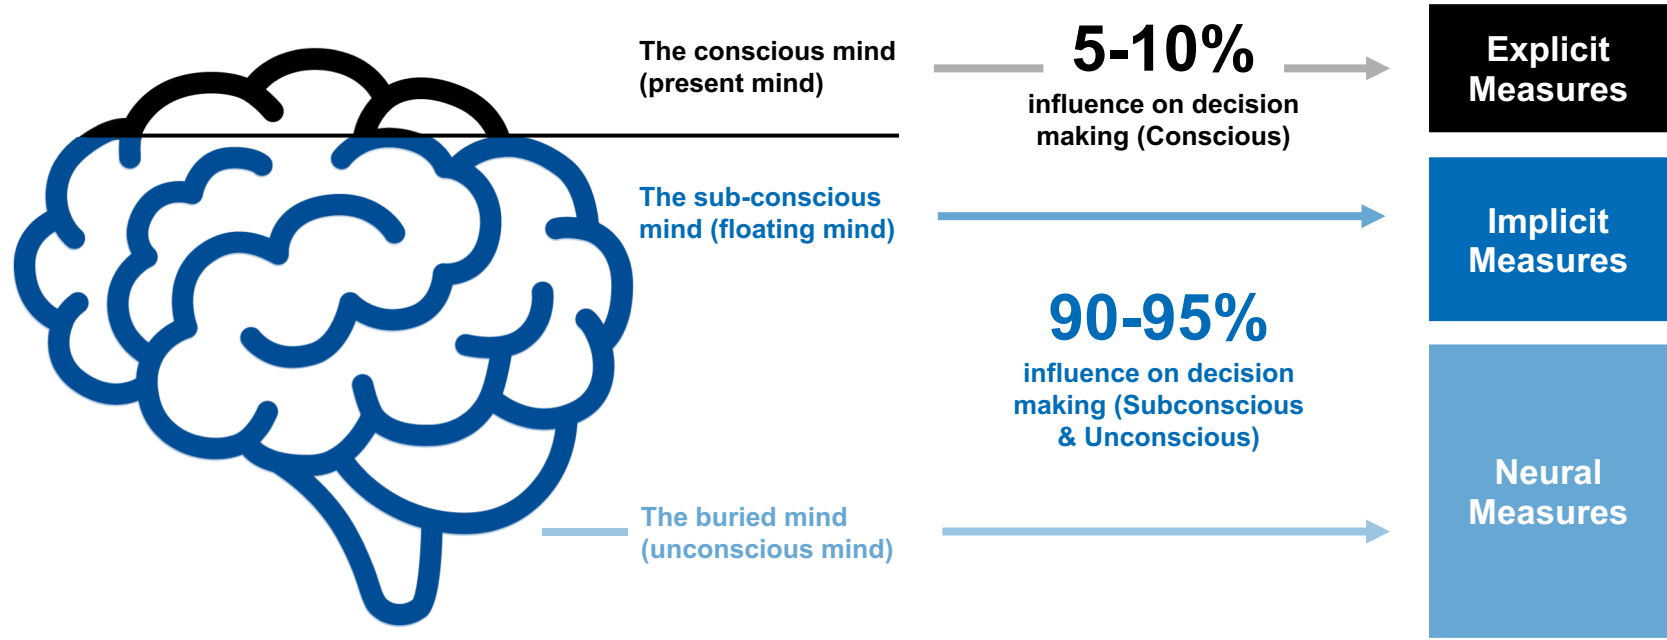

There is a quality continuum

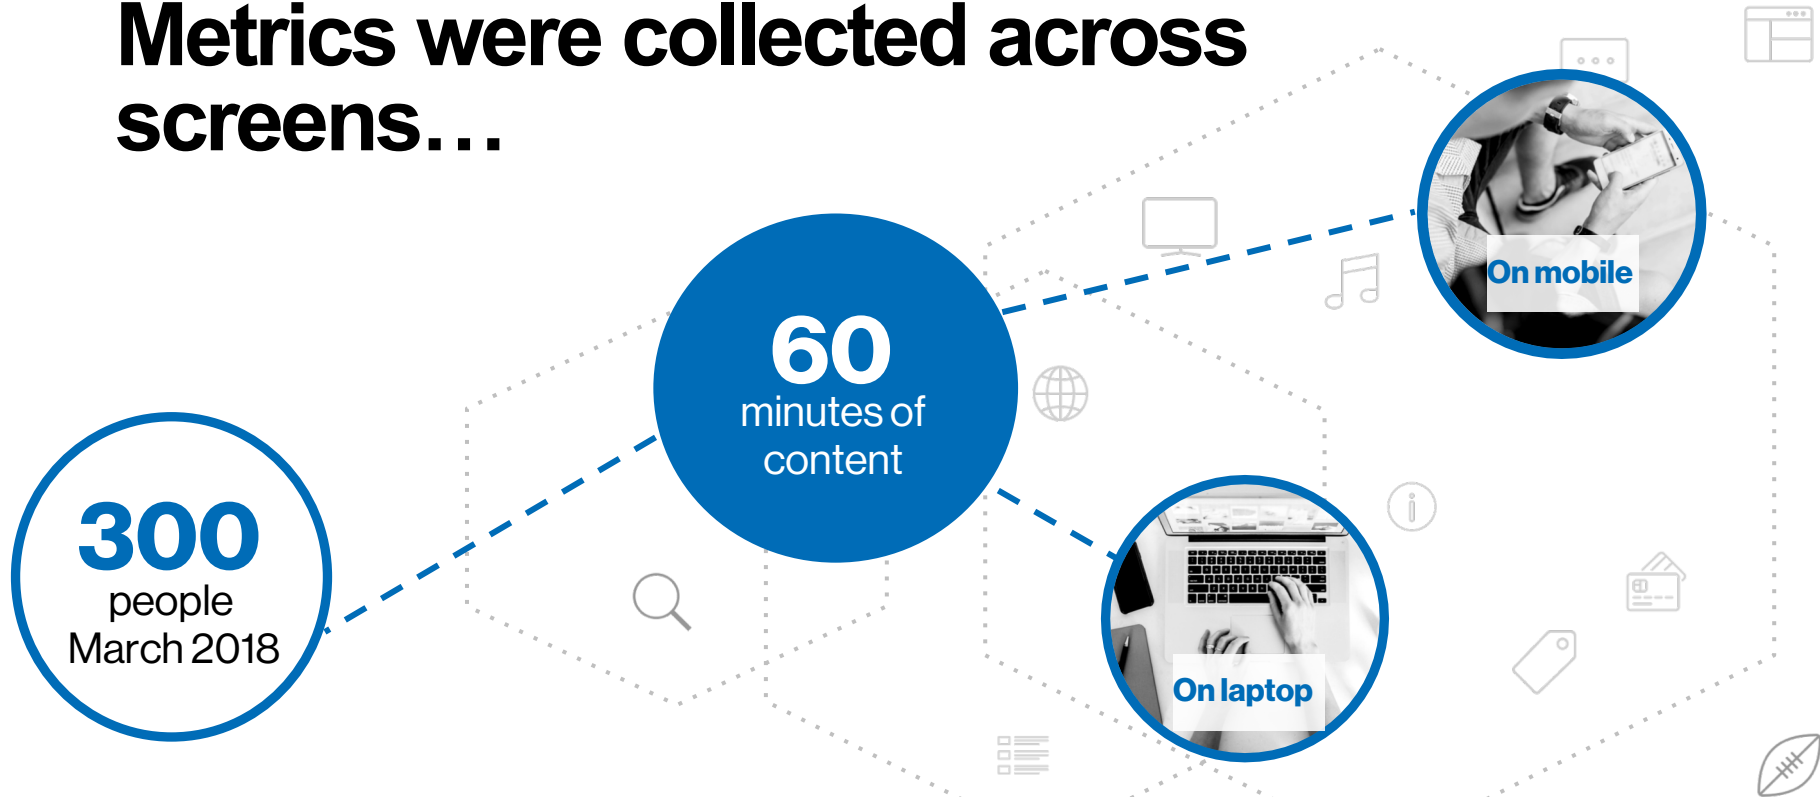

Unlocking the deeper response

“Much of what drives human decision making is not consciously accessible” Daniel Kahneman

High quality Example

The screenshot shows the Yahoo! Finance homepage. At the top is a navigation bar with links for Home, Mail, News, Sports, Finance, Celebrity, Style, Movies, Weather, Answers, Flickr, and Mobile. Below this is a search bar with the text "Search for news, symbols or companies" and a "Sign in" button. The main content area features a large banner for "Tim Hortons" with a "COLLECT TO WIN" promotion. Below the banner are several market data widgets showing indices like S&P/TSX, S&P 500, DOW, CAD/USD, CRUDE OIL, and BTC-CAD. A large article titled "The declaration of interdependence: Why the U.S. needs free trade with Canada" is prominently displayed, featuring a photo of Justin Trudeau and Donald Trump. To the right of the article is a "My Portfolio & Markets" section with a "Quote Lookup" search bar. The bottom of the page shows a row of smaller news thumbnails.

Lower quality example

The screenshot shows the Castanet website. At the top is a navigation bar with links for Home, Canada, World, Business, Sports, Showbiz, Classifieds, Real Estate, Opinion, Our Town, and Weather. Below this is a search bar with the text "Search for news, symbols or companies" and a "Sign in" button. The main content area features a large banner for "POWER LIKE A PRO" with a photo of a GMC truck. Below the banner are several news articles, including "Hwy 1 closed at Field", "Tech, aviation get boost", "Westcorp defends hotel", "Distilleries win gold", "Midwest gets a foot of snow", "Bike to work - in winter?", "Dirty dancers released", "Korean an Olympic yawn?", "Dog days of semester", and "Leaders to talk wine". To the right of the articles is a "Okanagan Oldies 103.9" section with a "LIVE" button and a "better together" advertisement. The bottom of the page shows a row of smaller news thumbnails.

Understanding the **neuro metrics** that matter

What is it?

Alertness & attention

Connection

Encoding to memory

What does it answer?

“Is the stimuli capturing my attention?”

“Is there a deeper relationship with the stimuli?”

“Is the stimuli being committed to memory?”

The quality of the ad environment **matters**

Ads in High Quality Environments vs Ads in Other Ad Environments

Case Study

Summing up the findings

1

**Canadians hold brands
accountable for where their
advertising appears**

2

Aligning with offensive content is damaging, and so is appearing next to low-quality content

3

**High quality content is trustworthy,
uncluttered and updated regularly**

4

Neuro data proves **connection** is
strongest on high quality content,
& **connection drives intention**

5

Factor in **device type, content category, and tone** to get contextual targeting right
